It would be unfair to XM Radio to not allow them to broadcast locally oriented news, traffic and weather. XM radio provides a service that is not available anywhere else. I pay for these services and it should not be up to the National Associatio of Broadcasters to dictate what I am permitted to hear. I respectfully urge you to reject petition 04-160 and to support XM Radio's ability to provide the kind of programming that I demand from them.

Sincerely,  
James Moore
